EDUCATION

Thadomal Shahani Engineering College (TSEC),

06/2023 – 06/2027

Bachelor of Engineering in Information Technology

Currently in 4th Year, Semester VII

- Relevant Coursework: Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks, Web Development, Python, Java, AI/ML, Cybersecurity, Data Mining & Business Intelligence (DMBI)

PROFESSIONAL EXPERIENCE

EPL Limited, IT Backend Intern

06/2025 – 07/2025

Lower Parel, Mumbai

Built backend data workflows at EPL Limited to integrate IoT machine data from the Poland manufacturing plant with SAP ERP orders. Designed and implemented PostgreSQL database tables and aggregated data views using SQL and DBeaver, while working on IoT data streaming and backend data management to support reliable integration of manufacturing data with enterprise operations.

SKILLS

Programming Languages

Java, C, Python, C#, SQL, JavaScript

Web Development

HTML, CSS, JavaScript, Bootstrap, React.js, Node.js, Django, Responsive Web Design, MERN Stack, Flutter

Data Science / AI

Python for Data Science, NumPy, Pandas, Data Visualization, Machine Learning, Deep Learning, Data Mining, Power BI, Data Analytics

Tools & Platforms

Git, Visual Studio Code, SQLite, Tkinter, DBeaver, PostgreSQL, Power BI, Excel, Jupyter Notebook, Canva

PROJECTS

Hotel Management System, Python, Tkinter, SQLite

Built a desktop hotel management system with authentication, customer management, room booking, billing and CRUD operations, backed by SQLite.

GitHub: github.com/RashiKamrani/Hotel-Management 

The Balanced Bite, Full Stack, Analytics

Built a full-stack bakery platform with product browsing, nutrition tracking, order management and admin analytics, including KPIs, revenue and category dashboards.

TripGenie, Python, ML

Developed an intelligent travel planning platform that generates personalized itineraries based on user preferences such as destination, duration, and budget. Implemented TF-IDF feature matching, cosine similarity recommendation engine, and K-Means clustering for itinerary optimization. Delivered outputs including schedules, maps, and weather insights.

Customer Churn Prediction, Machine Learning Analytics Project

Built a machine learning model to predict customer churn using customer behavioral data. Performed EDA, feature engineering, preprocessing, model training, and evaluation using classification algorithms.

FarmTrace, Hackathon Supply Chain Traceability Platform

Built a technology driven traceability platform during SIH Hackathon to improve transparency and trust in India's agricultural supply chain. Enabled farm-to-fork tracking through QR-based verification, real time monitoring, transportation stage visibility, and role based dashboards for farmers, distributors, retailers, and regulators and blockchain/IPFS integration for supply chain transparency.

EXTRACURRICULAR ACTIVITIES

- Former Design Executive, Institution of Electronics and Telecommunication Engineers (IETE) Committee
- Organized workshops and designed promotional materials, event creatives, and visual content

04/2024 – 03/2025
